

## Teachers' Guide to the EOC Equation Builder: Algebra I and Geometry

### Introduction

Students taking the Algebra I and Geometry EOC Tests will experience the Equation Builder below. The Online Tools Training (OTT) provides an opportunity within INSIGHT, the online testing platform, for students to engage with the equation builder prior to the operational assessment.

### Using the Equation Builder

- To enter text, click pointer in the **Response Box** and using the keyboard, type text.
- Click on the **Equation Builder** button  to open the tool.
- To enter any math symbols, characters, or math format (e.g., fraction, square root), click on the buttons provided, as needed.
- When finished, click on the **OK** button in the lower-right corner of the Equation Builder tool – the equation will be entered into the response box.

**Example:**

To create a fraction, click on the **Fraction**  button.

- Click in the top box to enter a number in that box.
- Click in the bottom box to enter a number in that box.

**To cancel what has been entered**, click on the **Cancel** button in the lower-right corner of the Equation Builder tool and you will be returned to the response box.

**To edit an existing equation**, double-click on the equation in the **Response Box**. This will re-open the Equation Builder.

## Using Keyboard Symbols/Characters

The Equation Builder does not include all symbols/characters students might need to type into the response box. The following is a list of symbols/characters students should know how to enter into a response box using the keyboard.

- Students should know how to type the following symbols using the keyboard: backslash and negative sign.
- Students should know that the  $\times$  button in the Equation Builder is a multiplication symbol and should not be used as a variable  $x$ .
- Students should know how to type  $\pm$  using the keyboard buttons +/- or otherwise give two separate numbers. For example,  $\pm 3$  as an answer could be written as +/- 3 or as 3 and -3.

## Additional Considerations for Students When Using the Equation Builder

The symbols outlined in red below (e.g., trigonometric functions, arc symbol, cursive letter l) are not used in Algebra I and should be ignored when using the Equation Builder in Algebra I. The symbol outlined in purple below (e.g., Greek letter theta) is not used in Algebra I or Geometry and should be ignored when using the Equation Builder in Algebra I or Geometry.
